

« having a ball » with sphere parking

Elizabeth R. Chen, mathe·magician, Harvard University

What is more FUN than playing with a beach ball & wet erase markers??
Doing actual math with them, of course!!

JOIN US for a hands·on exploration of sphere parking as we present our new algorithm. We should have enough spheres for everyone. This is an ACTIVE PARTICIPATION WORKSHOP (not a passive lecture). If you are expecting to just sit there and listen, then please just stay home.
