

Grant Proposals

Grant proposals ...

- Which funding agency?
- AMS/Simons Foundation grants
- AWM travel grants
- NSA grants (on pause)
- NSF grants
 - What should be contained in an NSF proposal?
 - How are NSF proposals reviewed?
 - [How to write a proposal narrative?](#)
 - What can be supported by grants?

Funding agencies ...

- **AMS / Simons Foundation:** Travel and Collaboration grants
- **AWM:** Travel grants
- **National Science Foundation (NSF)** provides 65% of the funding for academic research in the mathematical sciences, most of it through the Division of Mathematical Sciences (DMS)

Other funding agencies that provide funding for pure or applied mathematics are

		FY 2010 Actual	FY 2012 Budget
• Department of Defense			
• Air Force Office of Scientific Research (AFOSR)	National Science Foundation		
• Army Research Office (ARO)	Mathematical Sciences	245	260
• Office of Naval Research (ONR)	Department of Defense	102	132
• Defense Advanced Research Projects Agency (DARPA)	Air Force Off. of Sci. Res.	52	61
• National Security Agency (NSA)	Army Research Office	12	12
	Def. Adv. Res. Proj. Agency	12	28
	Natl. Security Admin	7	6
	Office of Naval Research	20	26
• Department of Energy	Department of Energy	93	109
	Applied Mathematics	44	49
• National Institutes of Health (NIH)	SciDAC ¹	50	60
	National Institutes of Health	89	92
	General Medical Sciences	50	52
	Imaging & Bioengineering	39	40
	Total Mathematical Sciences	529	593

AMS-Simons Foundation and Simons Foundation grants

- **AMS-Simons Travel Grants: two years duration**
 - Provides \$2K per year to early-career mathematicians for research-related travel
 - Eligibility:
 - PhD completed within the last four years
 - Employed by US institution or be US citizen working abroad
 - Not currently in residence at an NSF Mathematics Institute, and not receiving external funds with substantial support for research or travel
 - Application deadline in late March
- **Collaboration Grants for Mathematicians: five year duration**
 - \$5K per year for collaboration, travel, and research expenses
 - \$1K per year in discretionary funds for the awardee's department to enhance the research atmosphere within the department, plus \$1K per year in indirect costs
 - Eligibility:
 - Must have a tenure-track or tenured position at a US institution
 - Current record of active research and publication in high-quality journals
 - Not hold any other grants of over \$3K per year that include support for travel or visitors during the Collaboration Grant award period
 - Application deadline in late January

Association for Women in Mathematics (AWM) grants

- **AWM Travel grants:**
 - Provides up to \$2,300 for domestic travel and of \$3,500 for foreign travel
 - Goal: Funds travel and subsistence for a meeting or conference in the applicant's field of specialization. Eligibility:
 - Not receiving more than \$2,000 in external governmental travel funds
 - Work address in the US
 - Applications due February 1, May 1, and October 1
- **AWM Mentoring Travel grants:**
 - Provides up to \$5K
 - Goal: Funds travel and accommodation for an untenured woman mathematician to travel to an institute or a department to do research with a specified individual for one month.
 - Eligibility:
 - Work address in the US
 - Applications due February 1

National Security Agency (NSA)

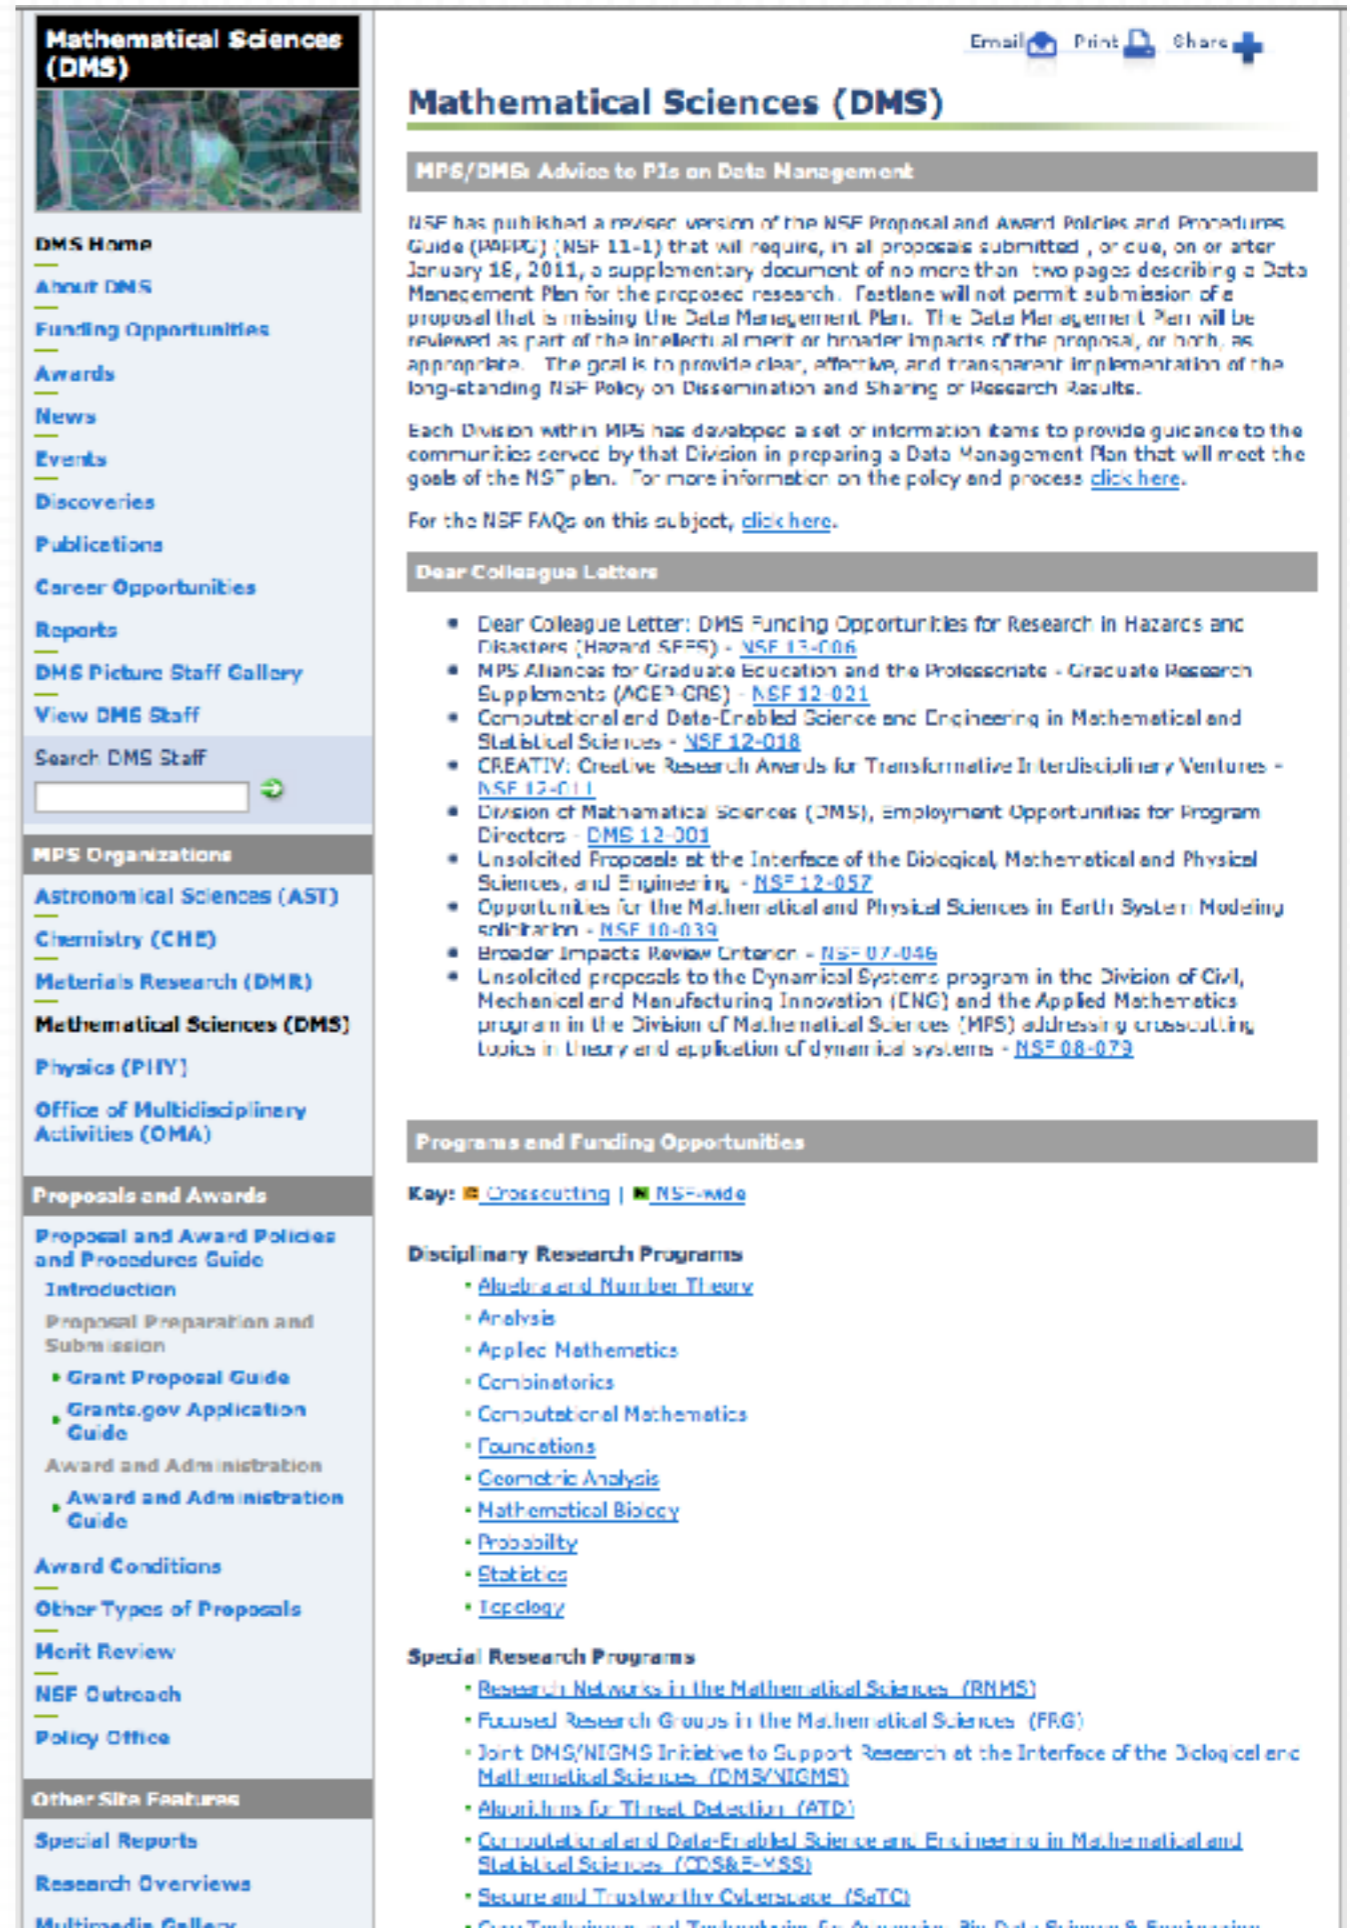

- **Mathematical Sciences Program**
 - Support research in Algebra, Number Theory, Discrete Mathematics, Probability, and Statistics (but not cryptology)
 - Young Investigator, Standard, Senior, Conferences/Workshops/REUs grants
 - Young Investigator grant: up to \$20K per year for two years
 - Eligibility: US citizen or permanent residents
 - Application deadline is 15 October (awards are made in the following fall)
- **Sabbaticals Program**
 - Work with NSA scientists on analysis of data sets, cryptology, discrete mathematics, signals analysis, number theory, probability, statistics ...
 - Eligibility: US citizen

National Science Foundation

NSF Division of Mathematical Sciences:
<http://www.nsf.gov/div/index.jsp?div=DMS>

- **NSF Postdoctoral Fellowships**
- **Standard PI grants** in disciplinary programs: Algebra and Number Theory, Analysis, Applied Mathematics, ...
- CAREER grants ...
- Conference grants ...
- and many other types of grants ...

Most universities require that proposals are submitted internally to the Office of Sponsored Projects some time before the NSF deadline: at Brown, 6 business days before the deadline!

MPS/DMS: Advice to PIs on Data Management

NSF has published a revised version of the NSF Proposal and Award Policies and Procedures Guide (PAPPG) (NSF 11-1) that will require, in all proposals submitted, on or after January 18, 2011, a supplementary document of no more than two pages describing a Data Management Plan for the proposed research. Fastlane will not permit submission of a proposal that is missing the Data Management Plan. The Data Management Plan will be reviewed as part of the Intellectual merit or broader Impacts of the proposal, or both, as appropriate. The goal is to provide clear, effective, and transparent implementation of the long-standing NSF Policy on Dissemination and Sharing of Research Results.

Each Division within MPS has developed a set of information items to provide guidance to the communities served by that Division in preparing a Data Management Plan that will meet the goals of the NSF plan. For more information on the policy and process [click here](#).

For the NSF FAQs on this subject, [click here](#).

Modes of Support FY 2009

Funding Rates and Number of Actions

NSF postdoctoral fellowships

- Eligibility: US citizen, national or permanent resident
- Competitive and prestigious awards (around 30-33 awards made per year)
- Support for 2 years (but can be spread over 3 years and combined with teaching)
- Affiliated with US or international institutions and organizations

- Research program for 2-3 years
- Fit with career goals
- Match with sponsoring scientist and with host institution

- Proposal consists of
 - Summary (1 page)
 - Description (3-5 pages)
 - Biosketch (2 pages)
 - Sponsoring scientist statement
 - 3-4 letters of reference (including one from PhD advisor); sponsoring scientist cannot write

- Applications due in mid October

NSF standard grants (usually 3 year duration)

- Proposal narrative (≤ 15 pages)
- Proposal summary (1 page)
- Biosketch (2 pages)
- Budget
- Budget justification
- Current and pending support
- Data management plan
- Facilities, equipment, and other resources

The NSF Grant Proposal Guide outlines the rules for each of these sections:
there are rules regarding format, font size, margins, content, ...

Proposal review ...

- Two kinds of reviews:
 - mail reviews
 - panel reviews: reviewers may not be in your immediate or even broader field!
- Reviewers and panels make recommendations to program officers
- Program officers make recommendations to the Division of Mathematical Sciences
- Only NSF's Grants and Agreements Division can award grants

Two review criteria:

- Intellectual merit: Scientific merits and your qualifications as researcher
- Broader impacts: (**must now be addressed in separate section in proposal narrative**)
 - Integration of research and education/training/mentoring
 - Plans to broaden participation of underrepresented groups?
 - Plans for broad dissemination?
 - Benefits to society?

It takes 6-8 months before you might hear from your program officer with a tentative decision

How to write the proposal narrative (≤ 15 pages) ...

- **Follow the guidelines!**
 - **Start early:** You may need 4-6 weeks to write a proposal.
 - **Get feedback:** Ask mentors and colleagues to read your proposal (well before the deadline!)
 - **Write well:** Do not assume that reviewers will be familiar with your area.
 - **Be persuasive:** Why should NSF fund this research? Why is your research important and why are you the person to carry out the proposed work?
-
- Choose some projects that you know how to address and others that are more open-ended; illustrate your vision; avoid being incremental or too open-ended.
 - Two bad extremes:
 - Long list of projects without any details (criticism: Do you have a plan for addressing them? What difficulties do you anticipate?)
 - Very short list of projects with many details (criticism: Is this enough for a 3-year grant?)
 - Motivate your projects: why are they important, what outcomes do you expect, how do you plan to approach them?
 - Give background and review your recent work in the area.
 - Address broader impacts explicitly in your proposal; also mention which projects will be worked on by undergraduate or graduate students.

Budget ...

- Salary (for up to two months)
- Support for graduate students and undergraduate summer research
- Travel to conferences
- Support for visitors
- Equipment such as computers
- Supplies

Key is to justify requests (name graduate students if known, list conferences you plan to attend, name visitors, justify need for new computers, justify requests for software, ...)
